Dear CUSOM Student Government Association and student body,

I, Indy Aronson, certify that I am running for the position of Student Government Association President in the 2023 election. As President, I will be sure to embrace the responsibilities of representing CUSOM's mission and student body in both the academic and medical fields of science. Within the scope of my duties and obligations as a President, I recognize that I must be both a leader and listener to most effectively represent our student body and ensure that the needs of every student are heard and addressed. I am running for President because I believe I am the most fit for fulfilling the responsibilities that come with its honorable title. My experience as a teacher assistant and lab instructor taught me how to work in an academic setting alongside faculty and peers. In doing so, I believe many of the traits and skills I developed during my time employed in the aforementioned roles will prove to be useful for instances of public speaking, creativity, and problem-solving when working with peers and faculty. As a student who had academic troubles during his undergraduate career but later found success in graduate school and currently in medical school, I have a well-versed understanding of academic struggles students go through and experiences with overcoming such adversity. I have valuable insight that allows me to be a valuable resource to students who may be struggling academically and work with them to resolve the issues and achieve their goals. Lastly, my experience as a captain and coach for various sports teams throughout my childhood and young adulthood has allowed me to hone my abilities in establishing a culture and teamwork among a team of diverse members. My goal-oriented drive has led me to success and as President, I plan on using that same drive to lead Campbell to equal success. With that said, I am humbled and honored to have the opportunity of running for CUSOM President to represent our incredible medical school program to the fullest.
