

I am running for Class of 2026 President because focusing on my fellow 2026 Classmates for all four years is how I can best serve them and CUSOM. My previous leadership positions were leading a Boy Scout troop throughout high school and leading my fraternity throughout college. While both situations are very different from being accountable to a class of medical students, I learned how to represent friends who shared common goals over the course of four years each. I see Class President in a similar way. I will be working for the people I see daily in our orange halls and have had the opportunity to connect with over these past several months. We all share the common goal of wanting to enhance the experience at CUSOM for ourselves and future classmates resulting in better physicians. I am proud of our school and all that it has accomplished for its age. I am confident there will be ways our student body, full of ingenious minds, will find to improve CUSOM further. My primary goal will be to always encourage open and honest discussions, listening for opinions and suggestions that I can forward to Administration. For those who have gotten to know me, I hope you have seen my welcoming personality as I want to encourage those conversations. If we haven't met, I will work to change that soon. Lastly, this position being a four year term is an important factor for me. I want to stay connected and work for you while we are in the classrooms and also while on rotations. Even when we separate out on rotation, I plan to actively reach out and learn how our clinical experiences can be improved. After speaking with 3rd and 4th years, the constant communication between the Class and Administration was emphasized as critical for the student experience. I look forward to the prospect of working for the Class of 2026 along with the others elected with the mutual goal of improving CUSOM and the educational experience at CUSOM.
