

To the CUSOM Student Government Association, Student Body, and Administration

This letter serves as my notification of intent to run for the Student Government Association Vice President position. As the Vice President I am willing to perform all the duties and roles required, including supporting both the newly elected SGA President and the student body as a whole. I am applying for this position because in the 6 months I have been on campus, I have seen how vibrant, involved, and insightful my classmates and upperclassmen have been. During the first block, I was thankful to have been not only able to talk to current students but have meaningful conversations with graduates about what steps now could help into residency. Seeing this collaborative atmosphere has led me to apply for this position to represent all students, present and future, so that CUSOM can continue to excel. In the recent past, I have served in leadership in both club and academic formats. I served as the Coordinator of my college band's volunteer organization. In this role, I was responsible for coordinating all volunteer events, advocating to our leadership to have additional opportunities, and supporting my fellow band members in all their volunteer endeavors. This opportunity specifically allowed me to learn how to best communicate with a large student body and organize their needs efficiently. My second position was as a Lab Teaching Assistant for three years. Through this position, I was responsible for blending what my supervising professors wanted my students to accomplish and what my students felt was possible in a way that all parties achieved a desirable outcome. This position taught me how to effectively communicate with an administrator about the needs of my students. I believe these two positions, in unique ways, have provided me with the knowledge and skills to represent our student body to our administration and accomplish whatever is needed. In addition, I have developed the time management possible to be academically successful while not feeling overwhelmed, so that I can listen to my classmates and perform this job to its fullest. As SGA Vice President I will represent all students, tackle and solve any problems that arise, in a rational way, and that allows for all components of CUSOM to work as one. Thank you for your time and consideration.
