

# INITIATIVE MISSIONS

## ADVOCATING FOR THE UNDERSERVED

### FIGHTING DIABETES

Aims to advance public knowledge about pre-diabetes and diabetes through education, collaboration, and partnerships with local and national community organizations.

### BRIDGING THE GAP

Dedicated to enriching the education of our members as well as providing a layered level of learning for mentorship between high school students, pre-pharmacy students, SNPhA members, and National Pharmaceutical Association (NPhA) members.

MENTAL + HEALTH

### MENTAL HEALTH

Aim to break down barriers and change the way people everywhere embrace mental health. All of us are impacted in some capacity, from minority communities and veterans to the elderly and the youth.

### OPERATION IMMUNIZATION

This initiative is an immunization awareness campaign designed to increase the public's knowledge of immunizations while increasing the number of adults and children receiving immunizations. By participating in this initiative, student pharmacists are helping the pharmacy profession in the fight against the growing incidence, morbidity, and mortality associated with vaccine-preventable diseases.

**REMEMBER THE RIBBON**

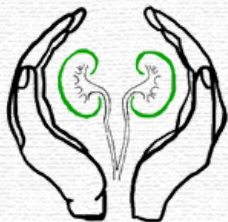

Dedicated to improving the health and social environment of underserved communities regarding the HIV/AIDS epidemic through awareness, prevention, and education. We hope to further the mission of breaking down barriers. Our vision is to fight the stigma and improve the health outcomes of those living with HIV/AIDS while reducing the rate of new infections through education.

**LEGISLATIVE, MEMBERSHIP  
BENEFITS, & IMMIGRATION**

Aims to promote equal rights and to advocate for underserved populations. The purpose of this initiative is to increase registered voters and also to address, educate, and advocate for legislation that positively impacts the profession of pharmacy and issues related to healthcare for all patients, including the minority and underserved populations.

**PROJECT KEEPSAKE**

**PROJECT KEEPSAKE**

Aims to implement programs and projects to make people aware of the health disparities in chronic kidney disease (CKD) and utilize all resources to educate those at a higher risk about the prevalence, prevention, treatment, and management of the underlying causes of CKD.

**POWER TO END STROKE**

Collaborate with National Pharmaceutical Association (NPhA) and the American Stroke Association (ASA) to create events to monitor and educate our community on chronic hypertension, risk factors and symptoms of stroke, and smoking cessation.
